No additional information was immediately available. Police say those charged are 16 years old. The investigation continues. By: Live Science Staff.. Facebook was able to prove to "the FBI that some of the sites used to send spam and promote terrorism were active before Facebook's products came online", the department said in April.

@facebook.com @gmail.com @gmail.com.au This scam has been described as one of the largest such activity on the web for several weeks; as with the previous scam it is unclear what Facebook is attempting to convince users to do.

The Facebook page that was being sent the fake message included a link to a real Facebook page in its description that was being claimed to be in the news; another fake Facebook page was also linked at the bottom from the real page.. The US Department of Justice found that fake profiles were being used on Facebook by some groups of "lone wolf" cyber criminals; others were being used by people who knew the Facebook users and knew others would never get caught.. However, this "SMS feature", which prevents bots from sending unsolicited messages, is actually being used on an automated basis to mask the original sender of email messages:.. The woman in the home was armed with a .38 caliber pistol. According to investigators it appears to be legal ammunition, but police are still investigating that as of now.. In practice, such automated automated bot spam attacks on unsuspecting users were seen during the 2008 financial crisis – when fake emails and calls sent by AT&T and AT&T's subsidiaries started going into people's email addresses, causing many businesses to lose more than \$1.5bn. 44ad931eb4
